Teaching Phonemic Awareness to Young Children

Two of the best predictors of success in early reading are phonemic awareness and alphabet knowledge. Developing phonemic awareness in young children is central in learning to read and spell. Participants will be provided with an overview of why developing phonemic awareness is crucial for readers in the early years. This professional learning session will focus on generalizable instruction procedures, modeling by the presenter and practice teaching of the ten focus skills and video demonstrations.

Participants will receive “Phonemic Awareness: The Skills That They Need to Help Them Succeed”, (Heggerty, 2010).

What: Teaching Phonemic Awareness to Young Children

Who: PreK and Kindergarten Teachers

When: Wednesday, November 11 from 4:30-7:30

Where: Room 302 of the Thorburn Education Center
